## Report on Group Discussion Activity

On 06 of April 2018, the Group Discussion activity was conducted on the topic '**Social Media: Impact on Human behavior and Society**'. At the beginning of the session everybody seemed hesitant in expressing their opinions but soon the discussion picked up the pace and the purpose of discussion, which was to speak up and boost their confidence, was fulfilled.

The discussion was between three groups, first group chose to highlight the positive impacts of social media, while the second group comprised of students who perceived negative impacts of social media and the third group was the neutral group that apprised about both the benefits and challenges of social media.

The points discussed in the favor of the topic were like 'it makes people broad minded, helps in expanding knowledge, makes easy to find jobs, promotes digital marketing, access to more information and enhance social connectivity and communication. 'The views against the motion were 'leads to false trap, self-obsession and materialism, means of spreading fake news, and promotes gossips trolling and addiction.'

Eventually, one of the participants was asked to summarize and conclude the GD, highlighting all the important points discussed by all the participants. Overall discussion was fruitful and positive because each one of them contributed good information and everyone listened with the utmost interest when other members were sharing their ideas. And gradually brought everyone in mainstream by boosting their self-confidence.
