## **Theme of the workshop:**

This workshop is on Intellectual Property (IP). It deals with any basic construction of human intelligence such as artistic, literary, technical or scientific constructions. Intellectual Property Rights (IPR) refers to the legal rights granted to the inventor or manufacturer to protect their invention or manufacture product.

Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity.

The workshop on Importance of Intellectual Property Rights and Patenting (IIPRP-2019) was organized by department of Management, SSBES's Institute of technology and Management, Nanded.

The objective of this workshop was to create awareness about Intellectual Property Rights (IPR) in all the Sectors, thereby furnishing requisite guidance and proficiency about a collection of procedures of copyrights, patents, trademarks, and publicity rights search and application filing. The Workshop is indeed a platform to foster pioneering minds amongst participants and identification of protectable innovations. Intellectual Property Rights (IPR) are set of rights associated with intangible creations of the human intellect. It covers laws related to copyrights, patents, trademarks, and publicity rights. The foremost purpose of intellectual property is to encourage the creation of a large variety of intellectual goods.
